

# SmartPID2000 Module

## Inside of Smart Array Controller

The **SmartPID2000 Module** is installed in the **SmartACU2000B** cabinet to reduce the negative effect of the Potential Induced Degradation (PID), and to support 1000V/1100V/1500V DC System.

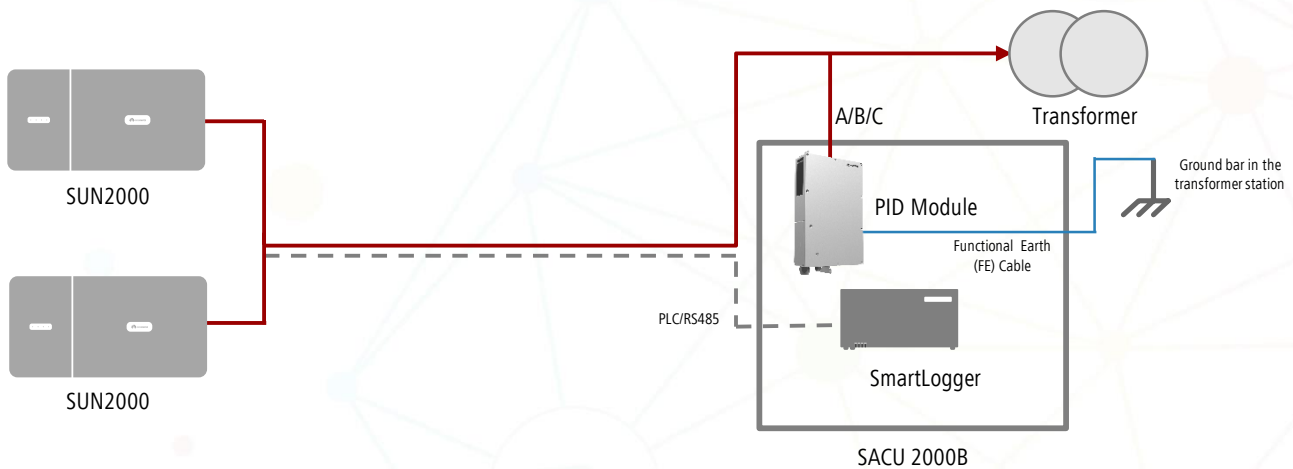

### Smart

- Data reading and software upgrade through USB or the embedded Web
- Support 1000V / 1100V / 1500V DC system and can support a 5MW block
- Set and display the PID module operating parameters by mobile phone APP and Bluetooth connection

### Reliable

- Protection degree of IP65

### SmartPID2000 Solution Diagram

Note:

1. The PID solution could ONLY be deployed in utility installations which are normally connected to the medium voltage (MV) grid WITHOUT neutral line.
2. The PID module must work with Huawei SmartLoggers and Huawei inverters.
