

Set alarm notification on FusionSolar

Huawei Technologies Co. Ltd.

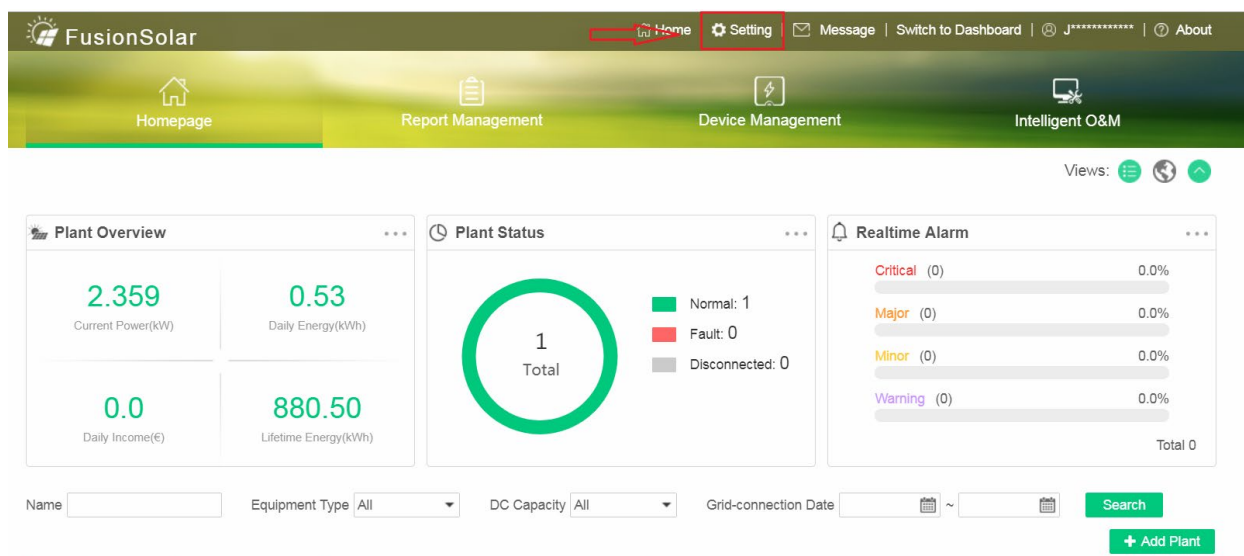

Version	Created by	Date	Remarks
01	Huawei e84081311	28.02.2019	Alarm notification

The information in this document may contain predictive statements including, without limitation, statements regarding the future financial and operating results, future product portfolio, new technology, etc. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied in the predictive statements. Therefore, such information is provided for reference purpose only and constitutes neither an offer nor an acceptance. Huawei may change the information at any time without notice.

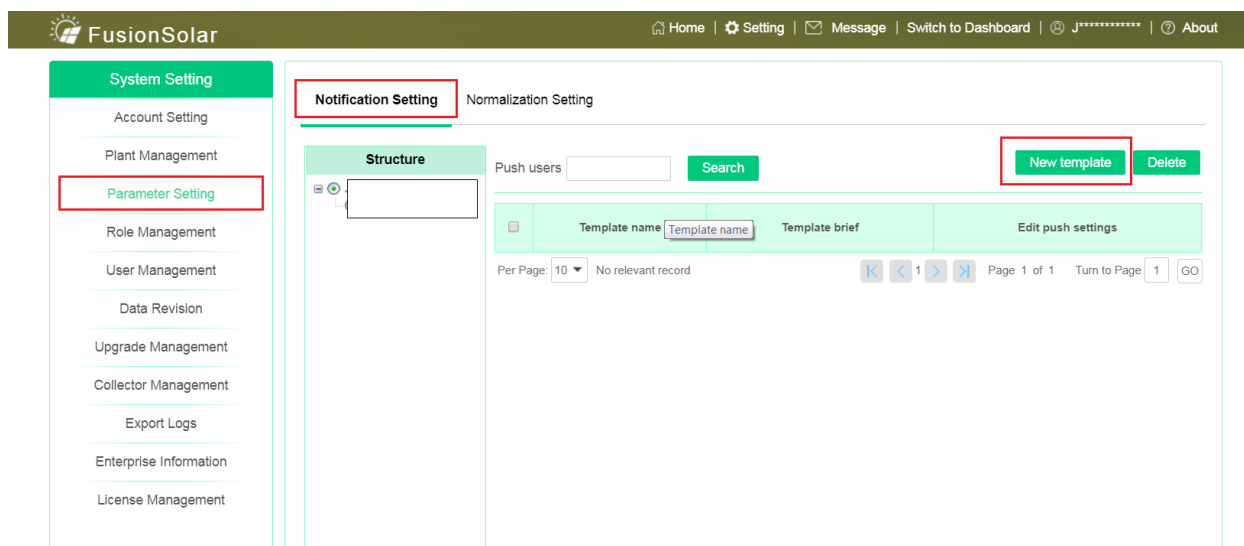

This document describes how to set alarm notification.

Procedure

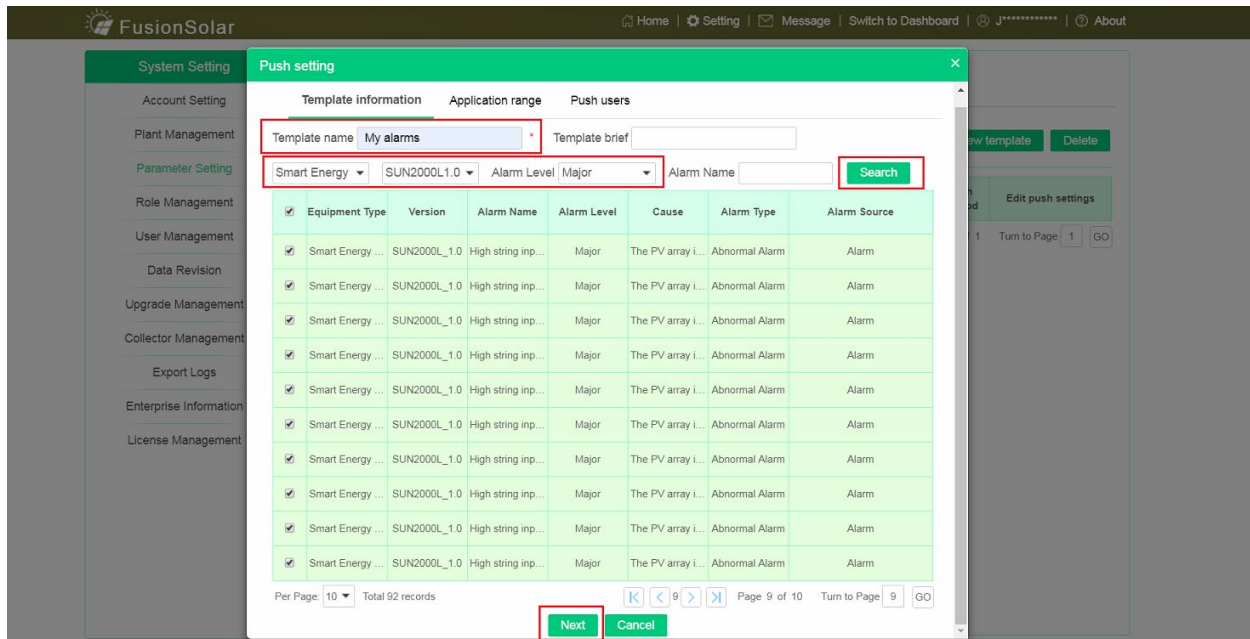

1. On the system homepage, click **Settings** to go to the **System Setting** interface.

2. Click **Parameter Setting** in the navigation bar on the left. By default, **Parameter Table Setting** will be opened.
3. Click **Notification Setting** and select **New template**. The organization structure and alarm template list will be displayed in the interface.

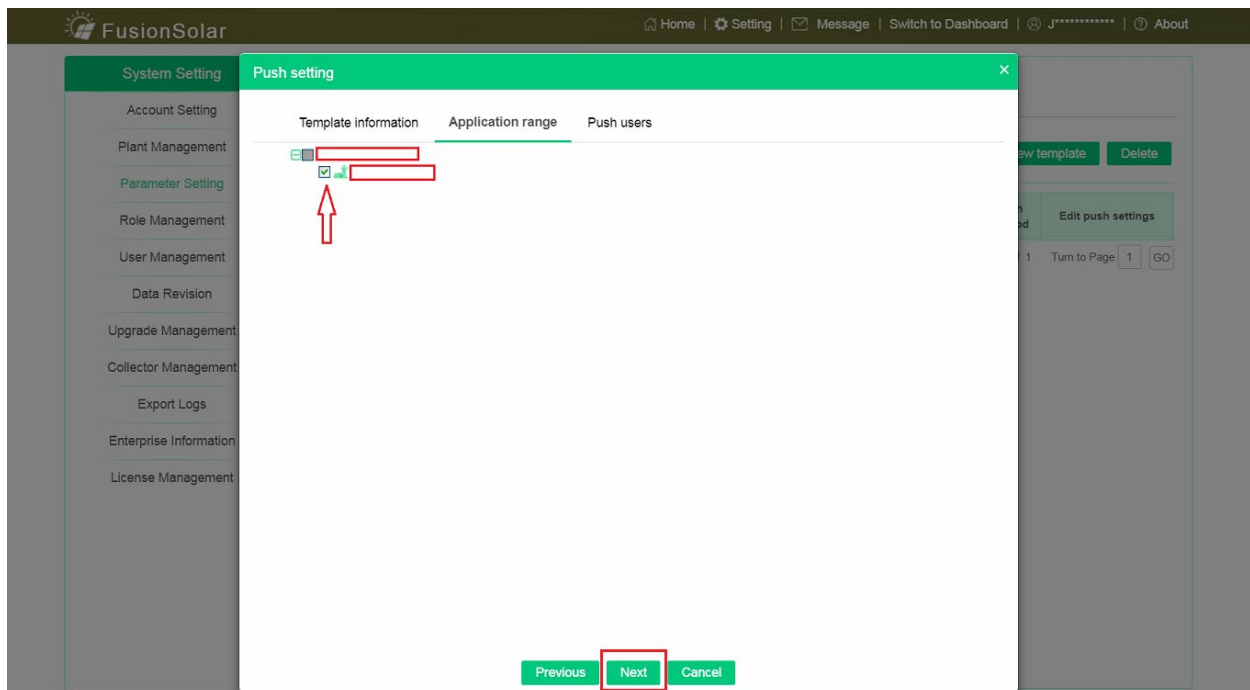

4. In the **Push settings** set the template name, select the device type and search. From the display alarms you can choose what alarms you want to receive or you can select all. Set the application range, and click **Next**

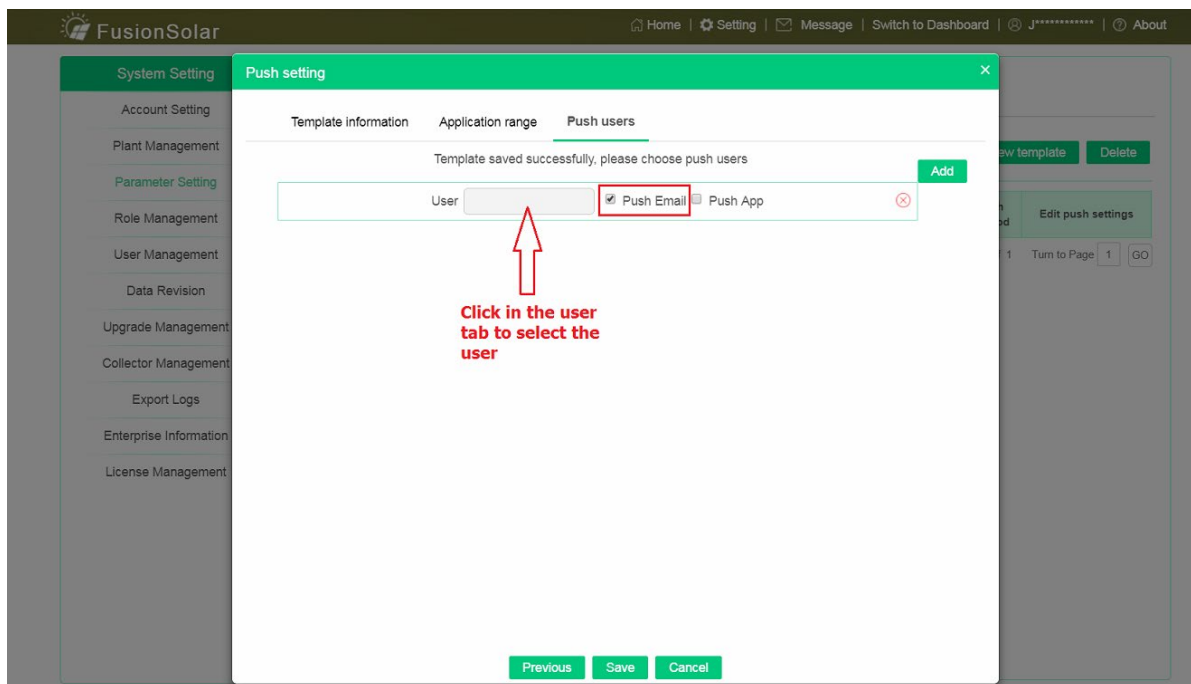

Equipment Type	Version	Alarm Name	Alarm Level	Cause	Alarm Type	Alarm Source
Smart Energy ...	SUN2000L1.0	High string inp...	Major	The PV array i...	Abnormal Alarm	Alarm
Smart Energy ...	SUN2000L1.0	High string inp...	Major	The PV array i...	Abnormal Alarm	Alarm
