

Benefits to installers

>>> One-fits-all Solution

Huawei solution includes inverter, optimiser, safety box, energy meter and interface for battery to meet various customer's demands.

>>> Flexible Design & Easy Installation

Huawei FusionHome solution allows installers to be more flexible in the system design, no need to avoid shade-prone areas and different orientations, increase solar system's capacity which brings you higher income.

The ultra-compact inverter, weighs only 10.6kg, it can be easily installed by just one electrician. The inverter configuration can also be done by just one click of using "save file" feature.

All of these features makes system design, installation & commissioning easier than ever before.

>>> Smart Management*

Huawei FusionHome solution supports remote module-level monitoring, allowing installers to provide quick trouble-shooting to satisfy customers. Installers can remotely upgrade end user's system by one-click during after-sale service to reduce maintenance cost.

* Requires Smart PV Safety Box and full Smart PV Optimisers.

Conventional Solution

*Onsite O&M
Higher operation cost*

Huawei Solution

*Monitoring performance
of each panel remotely*

>>> A Trustworthy Brand

Huawei is a world leading inverter supplier with accumulated over 65GWs global deployment, it is preferred choice for PV investors and developers worldwide for its leading smart PV solution, excellent quality and lifecycle guaranteed service.

By working with Huawei, we aim to make installer's business easier and sustainable.
